# Summary & Select Findings

# Summary & Select Findings: Replacement & Influence

## Program design and disruptions (e.g., waitlists) shape impacts

### Vehicle Replacement

- Increased to 85%
- >77% of replaced vehicles were gasoline-fueled; over half were MY 2013 or older

### Incentive Influence

- 90% found rebate important enabler of EV acquisition; 54% would not have purchased/leased without it
- At MSRP greater than \$60k, rebate influence decreases substantially
- Attractive offerings (including Tesla products) have somewhat lower *Rebate Essentiality*, but the differences between luxury/non-luxury MSRPs are bigger
- Rebate influence and federal-tax-credit influence are similar
  - Over half rated federal tax credit an extremely important enabler
  - Down somewhat from 2018 peak when all vehicles were still eligible
