

CVRP for Car Sharing and Rental Fleet

Introducing a unique opportunity for electric vehicle adoption

CVRP for Fleets is part of the **Clean Vehicle Rebate Project** and offers up to \$4,500 for the purchase or lease of new, eligible zero-emission and plug-in hybrid light-duty vehicles for **car sharing and rental fleets**. Sponsored by the California Air Resources Board, the program is administered by the Center for Sustainable Energy.

Application

All fleets must submit a CVRP application for each vehicle acquired. To begin the process, visit CleanVehicleRebate.org/eligible-vehicles.

Car Sharing and Rental Fleet Program Eligibility

Car sharing and rental fleets are eligible for up to 20 rebated vehicles per calendar year. Original lease terms must be for a minimum of 30 months, and the vehicle must remain in California and available for rent for a minimum of one year. Check eligible vehicles at CleanVehicleRebate.org/eligible-vehicles.

Reduced Ownership Provision

Because car sharing and rental vehicles are typically circulated out of fleet operations in less than the 30-month ownership or lease period CVRP requires, a reduced ownership provision is available. Under this provision, car sharing and rental fleets are eligible for up to \$1,800 in rebates per vehicle if they own and operate the vehicle for over one year and less than 30 months.

Long-Term Ownership

Vehicles owned and operated 30 months or longer are eligible for up to \$4,500 in rebates per vehicle.

Rebate Amounts

FUEL-CELL ELECTRIC VEHICLE

Standard Rebate
\$4,500

Reduced Ownership
(for car sharing and rental)
\$1,800

BATTERY ELECTRIC VEHICLE

Standard Rebate
\$2,000

Reduced Ownership
(for car sharing and rental)
\$800

PLUG-IN HYBRID ELECTRIC VEHICLE

Standard Rebate
\$1,000

Reduced Ownership
(for car sharing and rental)
\$400
